

Double Joy v4: see the real output

US\$12 before applicable tax | Digital ZIP | Mac desktop Chrome

One wedding. Two complete language faces.

Actual v4 export: each page is 5 x 7 inches. No physical print test has been performed.

You enter and proofread names, dates, venues and both languages yourself.

No translation or lunar-calendar conversion. This is not a Canva source file.

Example: wedding November 7, 2026; tea ceremony November 6, 2026.

Check both dates against your agreed event note before printing.

Save your editable words. Export your print copy.

1. Open the included offline HTML editor in desktop Chrome on your Mac.
2. Edit every card; do not assume changing one field updates every language.
3. Save draft downloads JSON. Open draft restores it and replaces current fields.
4. There is no autosave. Save again after changes and keep the JSON file.
5. Export PDF produces a static 3-page or 4-page set. PDF cannot reopen as a draft.
6. Reopen all PDF pages; check wording, fonts, size and alignment with your printer.

Preview only: not the paid editor, full kit, translation or printing service.
